## **ABSTRACT**

Ubiquitous healthcare aims to provide overall healthcare anywhere, anytime based on ubiquitous technology. We considered the needs to ensure safety and effectiveness for U-health care which is used different environment from conventional medical devices. To draw up evaluation method for safety and effectiveness, we have prepared 「The guidance for review and approval of U-health care medical device」 which includes the requirements of them since 2007. In this poster, we present the Guidance for review and approval of the U-health care medical device.
